SUMMARY

- A solid, aggressive batter — strong vs pace.
- They get out most often to balls that are **full and wide outside off** (8.2 dismissals/100).
- Most often out **caught in the field** (49% of dismissals); most often to right fast (20).

COMMON THEMES

- right-hand bat, averaging 38.1 at a strike rate of 98.1.
- Carries a big share of the batting — 14.2% of team runs.
- Scores mainly through the off side (43%).

STRENGTHS

- Main scoring shot is the drive (50% of runs).
- The **drive** brings them 51% of their runs — 1.5× the typical Test batter's share. Scores unusually little off the **sweep** (3% of runs vs 7% typically).
- Handles both similarly (pace 40, spin 35).
- Starts securely — their dismissal rate barely drops once set (2.2 early vs 3.2/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (50%).

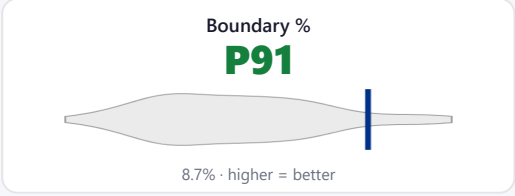

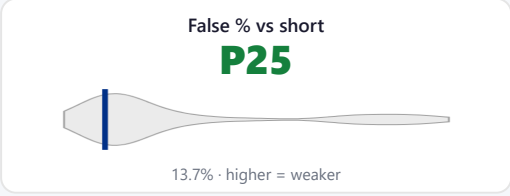

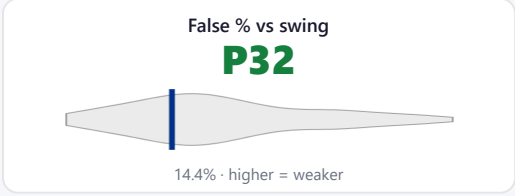

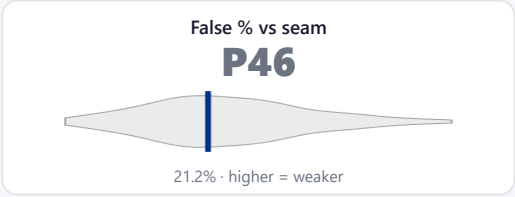

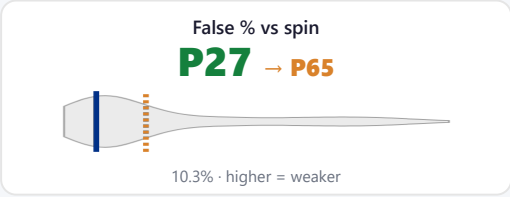

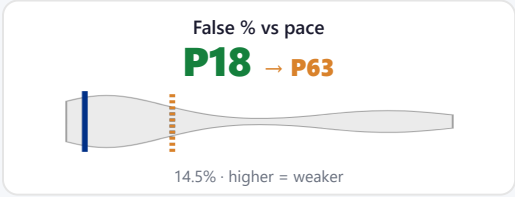

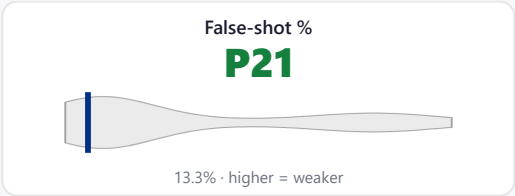

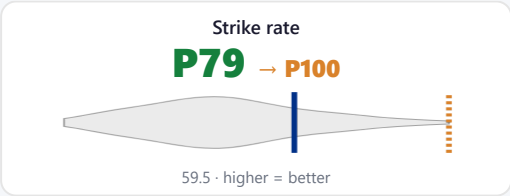

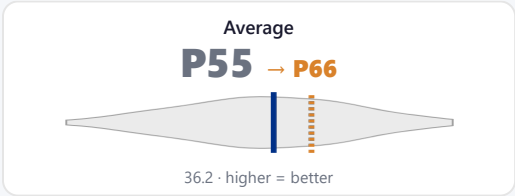

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (49% of dismissals); most often to right fast (20).
- Struggles **down the leg side** (27 avg, 4.4 outs/100).
- The ball that seams in hurts them (avg 26 vs 41 when it holds its line).
- Most dangerous ball: **full and wide outside off** (8.2 dismissals/100, avg 18).
- His **cut** is high-risk (false shot 31%, 5.9 outs/100).

Batting Fingerprint (percentile vs Test batters)

A solid, aggressive batter — strong vs pace.

Changing (last 3 years vs career): false % vs pace up; false % vs spin up; strike rate up.

Solid line = career, dotted = last 3 years (avg / SR / false% vs pace & spin). Percentile among Test batters (≥1500 balls). Red = a target (high vulnerability); green = a strength.

Match Impact (share of runs)

Makes **14.2%** of their team's runs over a career (typical innings 11.3%), and **7.1%** of all runs in their matches; carries the innings (≥25% of the team's runs) **17%** of the time, and dominates (≥40%) 5%.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Mitch Starc	Left pace	24.4	88.6	59.4	good length, 4th-stump channel	Caught behind 23.6%	Med
Xavier Bartlett	Right pace	28.1	86.4	53.5	good length, 4th-stump channel	Caught behind 26.4%	High
Adam Zampa	Leg-spin	31.6	91.7	56.2	good length, outside off	LBW 23.4%	Med
Josh Hazlewood	Right pace	34.6	84.1	46.6	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	35.0	96.4	51.1	short, 4th-stump channel	Caught behind 28.2%	High

Structurally, left-arm orthodox turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 5% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Bouncer plan

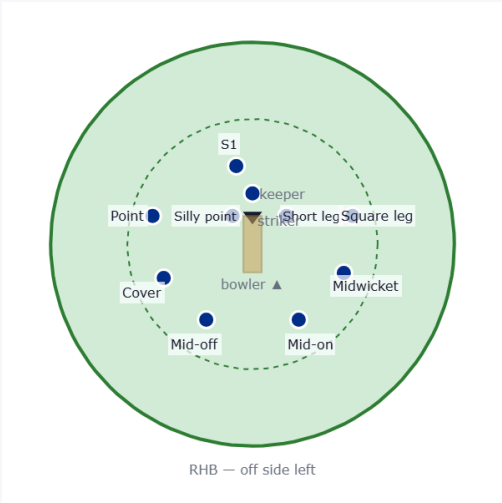

RHB — off side left

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller (P20), so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
