- They get out most often to balls that are **full and wide outside off** (8.7 dismissals/100).
- Most often out **caught in the field** (34% of dismissals); most often to right fast (24).

COMMON THEMES

- left-hand bat, averaging 49.6 at a strike rate of 105.3.

STRENGTHS

- Main scoring shot is the drive (37% of runs).
- The **slog** brings them 8% of their runs — 1.5× the typical Test batter's share.
- Stronger against spin (70) than pace (42); pace — especially the quicks — is the more productive line of attack.
- Starts securely — their dismissal rate barely drops once set (1.8 early vs 2.7/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (37%).

- The ball that swings in hurts them (avg 35 vs 53 when it holds its line).
- Most dangerous ball: **full and wide outside off** (8.7 dismissals/100, avg 24).
- His **slog** is high-risk (false shot 34%, 11.6 outs/100).

Match Impact (share of runs)

Makes **13.8% of their team's runs over a career (typical innings 12.6%), and 7.2% of all runs in their matches; carries the innings (≥25% of the team's runs) 13% of the time.**

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Mitch Starc	Left pace	24.6	90.4	59.2	good length, 4th-stump channel	Caught behind 22.8%	Med
Xavier Bartlett	Right pace	26.3	88.5	57.2	good length, 4th-stump channel	Caught behind 26.2%	High
Pat Cummins	Right pace	32.7	95.5	52.9	short, 4th-stump channel	Caught behind 27.4%	High
Josh Hazlewood	Right pace	33.2	87.7	48.8	good length, 4th-stump channel	Caught behind 26.3%	High
Cooper Connolly	Left-arm orthodox	35.1	85.0	50.2	back of a length, outside off	LBW 19.4%	Low

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 4% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Pure off-side / square stock field — Scores square and through the off (40% vs 29% leg) — an extra fielder square on the off, one leg-sider out..

Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 7% of their runs where mid-off stands — the spare run-saver to move as the game asks.

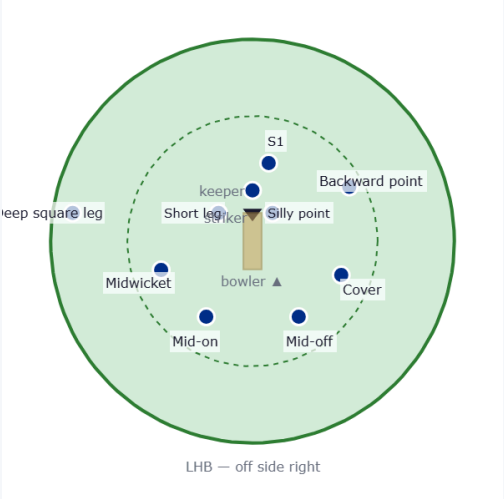

Bouncer plan

A standard bumper field — he isn't a heavy puller, so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).

Field vs off spin

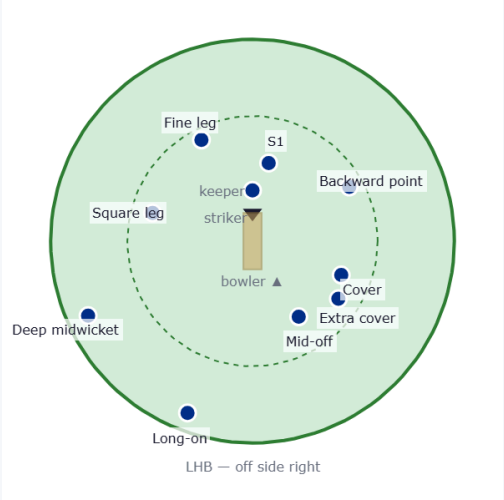

Early — first 30 balls · 345 balls

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against off spin, so the orthodox field stands — that is the read.

Floating fielder: Silly point sees few of their edges (0.1 vs 2.3 for the cordon) — float to backward point as needed.

Once set · 145 balls

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against off spin, so the orthodox field stands — that is the read.

Floating fielder: They score only 1% of their runs where fine leg stands — the spare run-saver to move as the game asks.
