Solid line = career, dotted = last 3 years. Percentile within same-type **ODI** peers (grey = the peer distribution, line = this bowler). Release/crease vs hand × pace/spin; movement/speed/repeatability vs pace/spin. **Crease variation** = how much they shift their release point sideways across the crease ball to ball (high = varies a lot, low = same spot every ball). **Repeatability** = length consistency over their stock-length band, so deliberate yorkers/bouncers don't count as poor control (high = tighter, more metronomic than peers). A marker at the very edge = beyond the typical peer range on that trait.

Phase Profile (where they bowl & how they go there)

► wickets

Corbin bowls most in the **middle** (54% of their overs) and goes at **9.00** at the death vs 5.19 in the powerplay.

Phase	% of overs	Overs	Economy	Wkts	Average	SR	Boundary %	Dot %	Avg speed
Powerplay	25%	27.0	5.19 P44	3 P29	46.7	54.0	15%	67%	139
Middle	54%	58.0	6.57 P6	5 P16	76.2	69.6	13%	46%	136
Death	20%	21.7	9.0 P14	5 P12	39.0	26.0	17%	32%	135

Blue **P##** = percentile vs modern-era ODI pace peers in that phase (two-new-balls era, 2011+; economy inverted so **higher** = **harder to score off**, wickets = strike threat; grey = bottom third). So a high death-economy percentile means cheap for the death, where everyone leaks.

Length & Variation Deep-Dive (yorkers, bouncers & slower balls — how often, what line)

► slower balls

How often, by phase — % of that phase's legal balls

Phase	Yorker / full	Bouncer / short	Slower ball	Slower yorker	Slower bouncer	Econ
Powerplay	1%	0%	1%	0.0%	0.0%	5.19
Middle	1%	3%	6%	0.3%	0.3%	6.57
Death	25%	4%	9%	0.0%	0.8%	9.0
Overall	6%	2%	6%	0.2%	0.3%	6.71

Yorker line ►

Wide (the hole)	13%
Off / channel	24%
At the stumps	26%
Leg stump / straight	37%

Full balls only (38), by pitch line.

Bouncer line ►

Wide (outside off)	29%
At the body / head	50%
Down the leg side	21%

Short balls only (14), line at the stumps.

Match-ups (each hand, split over vs round the wicket)

Batter	Balls	Round %	Economy	Wkts	Average	SR	Boundary %
vs LHB	214	30%	6.31	9	25.0	23.8	14%
· over the wkt	149		6.4	7	22.7	21.3	15%
· round the wkt	65		6.09	2	33.0	32.5	12%
vs RHB	426	5%	6.92	4	122.8	106.5	14%
· over the wkt	405		6.89	3	155.0	135.0	15%

Round % = share of their balls to that hand bowled from round the wicket. Sub-rows split each hand over vs round (shown when ≥30 balls).

Where They Bowl (pitch map + beehive · over vs round · stock vs slower)

On pace (stock speed)

Off pace (slower balls)

The % on each pitch map is that slice's share of all legal balls (e.g. over the wicket, on pace). Off pace = slower-ball variations.

ODI internationals only. Ball-change eras in this sample: two new balls (2011-Jul25) 16%; two→one from ov35 (Jul25+) 84%. Phase = Powerplay 1–10 / Middle 11–40 / Death 41–50. Economy charges wides + no-balls to the bowler. odi-1.2 · 19 Sep 2026.
