of team, per innings

CARRIES THE INNINGS

20%

innings with ≥25% of team

SUMMARY

- They get out most often to balls that are **back of a length and outside off** (3.1 dismissals/100).
- Most often out **caught in the field** (46% of dismissals); most often to right fast (6).

COMMON THEMES

- right-hand bat, averaging 59.3 at a strike rate of 97.0.
- Carries a big share of the batting — 20.4% of team runs.
- Scores mainly through the off side (43%).

STRENGTHS

- Main scoring shot is the drive (35% of runs).
- The **slog** brings them 12% of their runs — 2.2× the typical Test batter's share.
- Handles both similarly (pace 62, spin 57).
- Starts securely — their dismissal rate barely drops once set (1.0 early vs 2.2/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (39%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (46% of dismissals); most often to right fast (6).
- Vulnerable to the **back of a length** (averages 36 there vs 59 overall; 2.8 dismissals/100).
- Struggles **on the stumps** (40 avg, 3.2 outs/100).
- Most dangerous ball: **back of a length and outside off** (3.1 dismissals/100, avg 31).
- His **pull/hook** is high-risk (false shot 54%, 4.7 outs/100).

Match Impact (share of runs)

Makes **20.4%** of their team's runs over a career (typical innings 18.7%), and **10.2%** of all runs in their matches; carries the innings (≥25% of the team's runs) **20%** of the time, and dominates (≥40%) **7%**.

Against Each Bowler Type

Handles both similarly (pace 62, spin 57).

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Pace	61.6	102.9	26.0%	1.67	419
Spin	56.7	90.4	19.7%	1.60	376
Right Fast	56.5	104.3	26.5%	1.85	325
Leg Break	25.0	80.0	26.4%	3.20	125
Left Orthodox	118.0	97.5	17.9%	0.83	121

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (1.0 early vs 2.2/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (39%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	83.2	86	24%	1.03	9%	388
Once set (31+)	48.7	108	22%	2.21	11%	407

v Zimbabwe · 1 Test · 51 balls · 14 runs · avg 7.0
Too few balls in this series to compare a plan.

v Bangladesh · 1 Test · 4 balls · 0 runs · avg 0.0
Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Mitch Starc	Left pace	23.0	85.5	60.4	good length, 4th-stump channel	Caught behind 23.3%	Cohort
Xavier Bartlett	Right pace	27.8	82.8	53.4	good length, 4th-stump channel	Caught behind 25.2%	Med
Adam Zampa	Leg-spin	31.5	91.1	56.5	good length, outside off	LBW 21.4%	Cohort
Cooper Connolly	Left-arm orthodox	33.2	82.8	51.2	good length, outside off	LBW 20.1%	Cohort
Matt Renshaw	Off-spin	34.7	80.5	50.1	good length, outside off	Caught in the ring 19.6%	Cohort

Structurally, left-arm orthodox turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (vs pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Caught behind	2	15%
Caught	1	8%
Bowled	1	8%

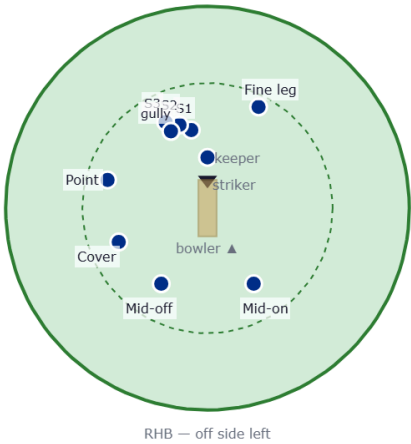

Where they score — runs by area (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs right-arm pace

Early — first 30 balls · 195 balls

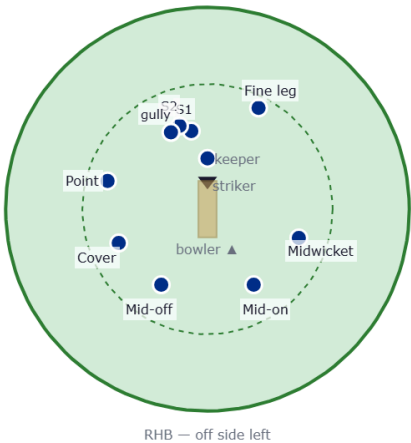

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 1% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Once set · 179 balls

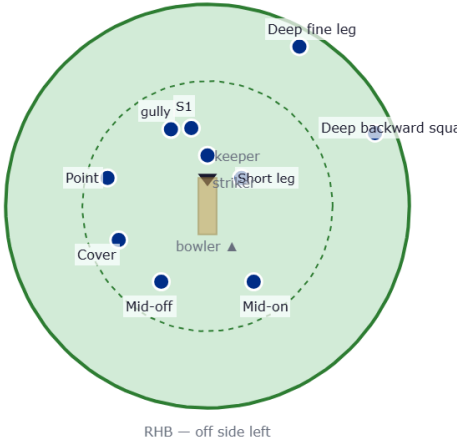

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 6% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller, so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
