SUMMARY

- A solid, aggressive batter — vulnerable to swing.
- They get out most often to balls that are **back of a length and outside off** (3.3 dismissals/100).
- Most often out **caught in the field** (33% of dismissals); most often to right fast (36).

COMMON THEMES

- left-hand bat, averaging 47.6 at a strike rate of 99.0.
- Carries a big share of the batting — 18.5% of team runs.
- Scores mainly through the off side (45%).

STRENGTHS

- Main scoring shot is the drive (33% of runs).
- The **sweep** brings them 10% of their runs — 1.4× the typical Test batter's share.
- Handles both similarly (pace 48, spin 46).
- Starts securely — their dismissal rate barely drops once set (1.9 early vs 2.3/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (40%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (33% of dismissals); most often to right fast (36).
- Struggles **outside off** (35 avg, 2.8 outs/100).
- The ball that seams in hurts them (avg 36 vs 53 when it holds its line).
- Most dangerous ball: **back of a length and outside off** (3.3 dismissals/100, avg 38).
- His **slog** is high-risk (false shot 36%, 16.7 outs/100).

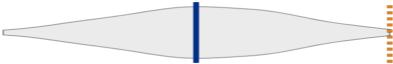

Batting Fingerprint (percentile vs Test batters)

A solid, aggressive batter — vulnerable to swing.

Changing (last 3 years vs career): average up; false % vs spin down.

Solid line = career, dotted = last 3 years (avg / SR / false% vs pace & spin). Percentile among Test batters (≥1500 balls). Red = a target (high vulnerability); green = a strength.

Match Impact (share of runs)

Makes 18.5% of their team's runs over a career (typical innings 15.2%), and 9.6% of all runs in their matches; carries the innings (≥25% of the team's runs) 32% of the time, and dominates (≥40%) 13%.

Against Each Bowler Type

Handles both similarly (pace 48, spin 46).

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Pace	48.1	98.6	18.4%	2.05	3,025
Spin	46.4	99.9	9.9%	2.15	1,626
Right Fast	49.3	100.6	17.4%	2.04	1,764
Off Spin	35.8	91.1	11.7%	2.55	943
Left Fast	48.1	93.0	18.3%	1.93	672
Right Medium	45.8	100.6	19.8%	2.20	501
Leg Break	76.6	112.6	9.2%	1.47	340
Left Orthodox	59.6	110.4	4.6%	1.85	270

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (1.9 early vs 2.3/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (40%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	47.1	87	19%	1.85	12%	2,376
Once set (31+)	48.0	111	12%	2.31	14%	2,292

v India · 1 Test · 89 balls · 55 runs · avg 27.5

They came round the wicket and hit a good length in the channel. 2 dismissals — 2 bowled.

Ball	Them	Teammates	
Round the wicket	78%	60%	▲ more
A good length	86%	74%	▲ more
Short	3%	19%	▼ less
Pitched in the channel	50%	37%	▲ more
Pitched at your pads	12%	28%	▼ less
Cut ball (short, wide off)	3%	12%	▼ less

v West Indies · 2 Tests · 332 balls · 233 runs · avg 116.5

They came round the wicket and stuck to a good length in the channel. 2 dismissals — 2 caught.

Ball	Them	Teammates	
------	------	-----------	--

v Pakistan · 2 Tests · 59 balls · 46 runs · avg 11.5

Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other LHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Mitch Starc	Left pace	26.6	89.1	57.0	good length, 4th-stump channel	Caught behind 22.1%	High
Xavier Bartlett	Right pace	27.8	87.8	55.4	good length, 4th-stump channel	Caught behind 24.9%	High
Josh Hazlewood	Right pace	33.8	85.6	48.8	good length, 4th-stump channel	Caught behind 25.8%	High
Pat Cummins	Right pace	33.8	95.5	51.8	good length, 4th-stump channel	Caught behind 27.4%	High
Cooper Connolly	Left-arm orthodox	35.5	90.3	50.9	good length, outside off	LBW 19.6%	Med

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (vs pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Caught	20	21%
Bowled	20	21%
Caught behind	13	13%
LBW	11	11%
Run Out	1	1%

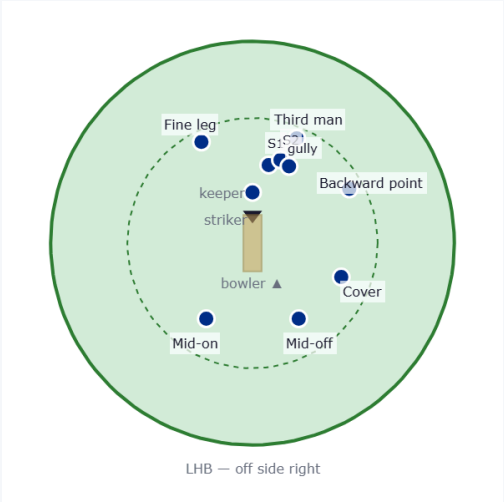

Where they score — runs by area (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Field vs right-arm pace

Early — first 30 balls · 1388 balls

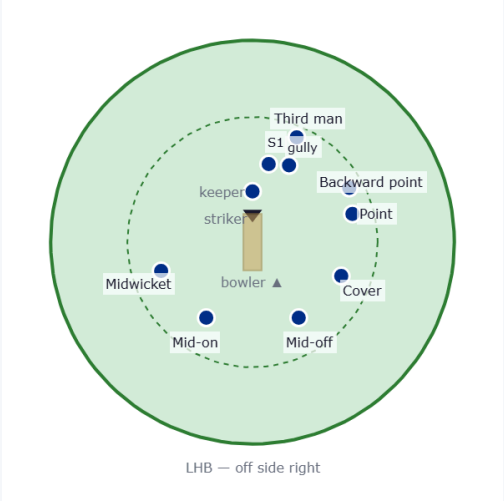

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 2% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Once set · 877 balls

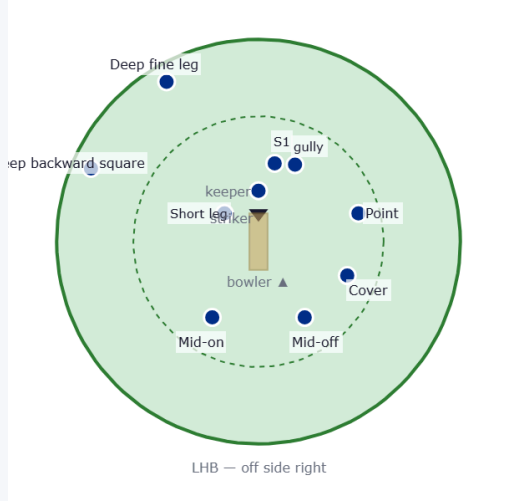

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure off-side / square stock field — Scores square and through the off (41% vs 23% leg) — an extra fielder square on the off, one leg-sider out..

Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 6% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Bouncer plan

A standard bumper field — he isn't a heavy puller (P24), so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).

Field vs off spin

Early — first 30 balls · 344 balls

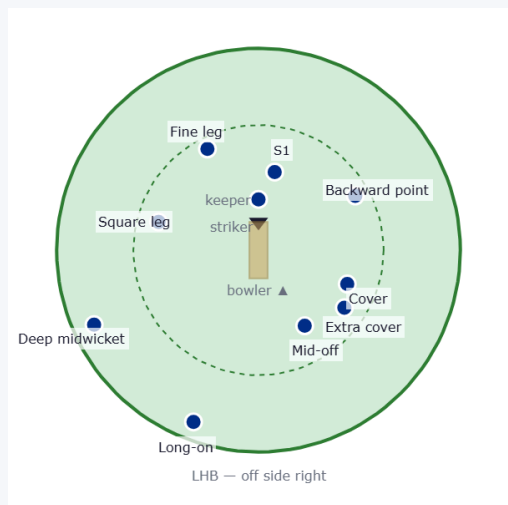

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against off spin, so the orthodox field stands — that is the read.

Floating fielder: They score only 7% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Floating fielder: Silly point sees few of their edges (0.2 vs 4.0 for the cordon) — float to backward point as needed.

Once set · 599 balls

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against off spin, so the orthodox field stands — that is the read.

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Silly point	Stock	Standard stock position.
Short leg	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Deep square leg	Stock	Standard stock position.

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Extra cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Long-on	Stock	Standard stock position.
Deep midwicket	Stock	Standard stock position.
Square leg	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Floating fielder: They score only 7% of their runs where fine leg stands — the spare run-saver to move as the game asks.
