SUMMARY

- A solid, steady batter — vulnerable to seam, strong vs short.
- They get out most often to balls that are **full and outside off** (7.7 dismissals/100).
- Most often out **caught behind** (30% of dismissals); most often to right fast (11).

COMMON THEMES

- left-hand bat, averaging 33.9 at a strike rate of 91.5.
- Carries a big share of the batting — 12.9% of team runs.
- Scores mainly through the V (50%).

STRENGTHS

- Main scoring shot is the drive (43% of runs).
- Handles both similarly (pace 32, spin 38).

WEAKNESSES / HOW TO GET HIM

- Somewhat more vulnerable early (3.0 vs 2.4 dismissals/100 once set). Early runs come mainly off the drive (52%).
- Most often out **caught behind** (30% of dismissals); most often to right fast (11).
- Vulnerable to the **back of a length** (averages 24 there vs 34 overall; 4.3 dismissals/100).
- Struggles **outside off** (18 avg, 5.2 outs/100).
- The ball that seams away hurts them (avg 13 vs 43 when it holds its line).
- Most dangerous ball: **full and outside off** (7.7 dismissals/100, avg 26).
- His **drive** is high-risk (false shot 32%, 3.9 outs/100).

Batting Fingerprint (percentile vs Test batters)

A solid, steady batter — vulnerable to seam, strong vs short.

Changing (last 3 years vs career): strike rate up; false % vs pace up; average down.

Solid line = career, dotted = last 3 years (avg / SR / false% vs pace & spin). Percentile among Test batters (≥1500 balls). Red = a target (high vulnerability); green = a strength.

Makes **12.9%** of their team's runs over a career (typical innings 7.4%), and **6.6%** of all runs in their matches; carries the innings ($\geq 25\%$ of the team's runs) 14% of the time, and dominates ($\geq 40\%$) 5%.

Against Each Bowler Type

Handles both similarly (pace 32, spin 38).

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Pace	32.0	87.7	31.2%	2.74	511
Spin	38.3	100.0	23.6%	2.61	230
Right Fast	29.6	84.5	33.9%	2.85	386

Start of Innings vs Set

Somewhat more vulnerable early (3.0 vs 2.4 dismissals/100 once set). Early runs come mainly off the drive (52%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	28.8	85	32%	2.96	12%	405
Once set (31+)	41.6	99	25%	2.38	9%	336

v India · 2 Tests · 190 balls · 104 runs · avg 26.0

Too few balls in this series to compare a plan.

v Pakistan · 2 Tests · 333 balls · 153 runs · avg 51.0

Too few balls in this series to compare a plan.

v Australia · 1 Test · 31 balls · 22 runs · avg 11.0

Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other LHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	19.8	81.0	62.7	good length, 4th-stump channel	Caught behind 26.7%	Med
Mitch Starc	Left pace	23.0	85.5	60.4	good length, 4th-stump channel	Caught behind 23.3%	Cohort
Josh Hazlewood	Right pace	26.0	77.9	53.0	good length, 4th-stump channel	Caught behind 26.2%	Med
Pat Cummins	Right pace	26.7	87.5	55.8	good length, 4th-stump channel	Caught behind 26.6%	Med
Nathan Ellis	Right pace	29.7	85.9	53.7	short, 4th-stump channel	Caught behind 27.5%	Med

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (vs pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Seam movement

Seam movement	Avg	SR	False%	Outs/100	Bdry%	Balls

Bowled	4	20%
Caught in the field	4	20%
Caught	3	15%
LBW	2	10%
Run Out	1	5%

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Field vs right-arm pace

Early — first 30 balls · 316 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 2% of their runs where fine leg stands — the spare run-saver to move as the game asks.

Once set · 150 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 1% of their runs where backward point stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller (P20), so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
