SUMMARY

- Plan for right-arm pace: bowl **good length pitching wide outside off**.
- Most often out **caught behind** (25% of dismissals); most often to right fast (2).

COMMON THEMES

- right-hand bat, averaging 34.5 at a strike rate of 58.2.
- Scores mainly through the leg side (44%).

STRENGTHS

- Main scoring shot is the drive (34% of runs).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught behind** (25% of dismissals); most often to right fast (2).
- Vulnerable to the **good length** (averages 23 there vs 34 overall; 1.9 dismissals/100).

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Fergus O'Neill	Right pace	25.7	45.3	38.0	good length, 4th-stump channel	Caught behind 26.7%	Med
Brendan Doggett	Right pace	27.6	61.3	43.4	good length, wide of off	Caught behind 25.9%	Low
Liam Hatcher	Right pace	29.3	58.6	42.4	good length, 4th-stump channel	Caught behind 26.0%	Med
Corey Rocchiccioli	Off-spin	29.6	59.8	44.4	good length, outside off	LBW 20.4%	Cohort
Liam Scott	Right pace	30.9	38.6	29.4	good length, 4th-stump channel	Caught behind 25.7%	Med

Structurally, left-arm orthodox turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (right-arm pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Length						
Length	Avg	SR	False%	Outs/100	Bdry%	Balls
Full	47.0	102	33%	2.17	20%	46
Good length	23.0	45	29%	1.94	5%	155

Speed						
Speed	Avg	SR	False%	Outs/100	Bdry%	Balls
<125	29.0	60	44%	2.08	10%	48
125–133	—	77	64%	0.00	11%	64

Pitching line	Avg	SR	False%	Outs/100	Bdry%	Balls
wide outside off	64.0	85	23%	1.33	15%	75
outside off	—	43	30%	0.00	4%	106

Over vs round	Avg	SR	False%	Outs/100	Bdry%	Balls
Over the wicket	45.0	60	27%	1.34	8%	224

How They Score & Get Out

Scores most of their runs through the leg side (44%; off 42% · leg 44% · straight 14%).

Shot types (risk)

Shot	Avg	SR	False%	Outs/100	Bdry%	Balls
------	-----	----	--------	----------	-------	-------

Where they score — runs by area vs right-arm pace (mirrored for a left-hander).

Most often out **caught behind** (25% of dismissals); most often to right fast (2).

Dismissal mode	Count	%
Caught behind	1	25%
Caught in the field	1	25%
Caught	1	25%
Bowled	1	25%

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs right-arm pace

Early — first 30 balls · 139 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where cover stands — the spare run-saver to move as the game asks.

Once set · 98 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller, so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
