Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Fergus O'Neill	Right pace	21.9	45.7	42.3	good length, 4th-stump channel	Caught behind 25.2%	Cohort
Liam Hatcher	Right pace	25.0	58.3	46.1	good length, 4th-stump channel	Caught behind 27.2%	Cohort
Brendan Doggett	Right pace	25.1	60.0	45.1	good length, 4th-stump channel	Caught behind 26.4%	Cohort
Liam Scott	Right pace	25.7	38.7	32.8	good length, 4th-stump channel	Caught behind 24.1%	Cohort
Corey Rocchiccioli	Off-spin	29.6	59.8	44.4	good length, outside off	LBW 20.4%	Cohort

Structurally, left-arm orthodox turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Field vs right-arm pace

Once set · 162 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller, so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).

Field vs left-arm orthodox

Once set · 133 balls

Fielder	Stock/Change	Why they're there

Deep midwicket	Stock	Standard stock position.
Square leg	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against left-arm orthodox, so the orthodox field stands — that *is* the read.
