Scouting Summary

COMMON THEMES

- Right Medium, averaging 136.9 kph (up to 142.6).
- Usually takes the new ball (opens in 50% of innings).
- Typical length is **7-8m** (their good length); median 6.9 m.
- Stock ball is a **good length outside off** (30% of deliveries).
- Goes round the wicket 72% of the time against left-handers.

BIGGEST THREATS

- Most dangerous length is **Good Length** (3 wkts, 2.6% adjusted strike).
- Takes 33% of wickets pitching a **good length in the 4th-stump channel**.
- Beats the bat 0.0% of tracked balls (false-shot 13.9%).
- Gets you **bowled** more than most — 50% of his wickets (2.8× the typical rate for this type).
- 0% of catches are behind the wicket (keeper / slips / gully).

AREAS TO EXPLOIT

- Concedes most runs pitching a **good length on the 6th stump** (20% of runs).
- Short ball: 16% of deliveries, economy 4.0 — 0 wkts from 24 short balls.
- Away from good length, the wicket threat drops off — look to score in the less-productive lengths.
- Cash in when he goes **good length outside off** (economy 3.8, beats the bat only 13%).

beaten + edges

How he gets you out	His %	Base	Index
Caught	50%	68%	0.74×
Bowled	50%	18%	2.79×

Share of his 4 wickets by type, indexed against the base rate vs the average pace bowler to LHB (men's Tests). **Index** >1 = he does it more than most, <1 = less. Caught is high for everyone — the signal is the over-indexed row.

Angle & variations: Round the wicket to LHB (72%), stays over to RHB

Stock Ball & Ball Types (vs left-handers) [▶ watch stock balls](#)

Stock ball — a good length outside off (30% of deliveries, economy 3.77). Minor variations: a good length wide outside off (15%) and full on the stumps (8%).

Ball type (pitch length × pitching line)	Movement	%	Econ	Wkts	Beaten %
a good length outside off ▶	—	30%	3.77	1	13%
a good length wide outside off ▶	—	15%	1.64	0	—
full on the stumps ▶	—	8%	3.00	0	—
full outside off ▶	—	8%	4.36	0	—
a good length on the stumps ▶	—	8%	4.36	0	—
a good length down the leg side ▶	—	8%	0.55	1	—

Ball type = pitch-length band × pitching-line region. **Movement** = swing in the air + seam/turn off the pitch, whichever is material, dominant first (ball-tracking, tracked balls only; blank if too few). **Beaten %** = false-shot rate on tracked balls. The stock-ball line above also notes where it passes the stumps.

WICKETS — WHERE MOST CAME FROM

A good length in the 4th-stump channel

33% of mapped wickets (1 of 3)

DANGER LENGTH

Good Length

3 wkts / 97 balls · 2.6% adj (3.1% raw) · low sample

RUNS — WHERE MOST CONCEDED

A good length on the 6th stump

20% of runs (14 of 71)

Most wickets come from a good length in the 4th-stump channel, while he leaks the most runs a good length on the 6th stump.

Zone shares are over his **mapped** wickets — 1 wicket pitched too full to place on the map (tracked length at/behind the crease), so they sit outside the grid.

Scoring Profile (vs left-handers)

60% of his runs come in boundaries — a boundary every 14 balls; runs come mostly by working him around (40% of runs).

BOUNDARY %

60%

runs in 1s & 2s

BALLS / BOUNDARY

14

Shot type	Balls	Runs	% runs	4s/6s	Runs/ball
Work/Nudge	15	19	40%	0	1.27
Drive	7	15	31%	2	2.14

Direction from ball-tracking (all scoring shots); shot type recorded on 100% of scoring balls (35/35) — groups with <5 balls omitted.

Pitch Maps & Scoring

At the Stumps (wickets)

— no ball tracking data

Ball position as it passes the stumps for wicket balls.

Where They're Scored Off

— no hit data

Where runs are scored, by fielding area.

Where They Pitch It

Pitches it a good length on the 5th stump most often (19%); mixes in the short ball (15%).

Where Wickets Come From

Wickets come mostly from balls pitched a good length in the 4th-stump channel.

Speed & Spells

Speed by Spell

By spell — opening burst vs later spells.

Speed by Innings

1st vs 2nd innings of the match.

Speed by Day

By match day — fatigue across the game.

Over vs Round the Wicket (vs left-handers)

Almost exclusively round the wicket to left-handers (72%, 111 balls); over the wicket is a rare change-up (28%, 43 balls).

Angle	Balls	Pitch line	Length	Short %	Econ	Wkts	Bdry %
Over	43 (28%)	Down leg	7.1 m	7%	3.77	2	74%
Round	111 (72%)	5th stump	6.8 m	5%	2.70	2	52%

Over the Wicket

Where he pitches it from over the wicket (43 balls).

Round the Wicket

Where he pitches it from round the wicket (111 balls).

Test-match career data. Beaten/false-shot use ~38% shot-quality tracking; turn/drift ~30% ball-tracking. Catches split by fielding position (DeliveryFielders view); some catches have no recorded position. Danger zones use empirical-Bayes shrinkage (≥3 wkts to qualify).
