Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Jack Edwards	Right pace	27.7	96.6	58.3	good length, 4th-stump channel	Caught behind 28.1%	Cohort
Todd Murphy	Off-spin	27.9	93.7	59.9	back of a length, outside off	LBW 17.2%	Cohort
Liam Scott	Right pace	35.6	89.0	49.2	good length, 4th-stump channel	Caught behind 26.5%	Cohort
Tanveer Sangha	Leg-spin	39.0	111.2	56.0	good length, outside off	Caught in the ring 20.6%	Cohort
Nathan McSweeney	Off-spin	46.6	97.5	45.8	back of a length, outside off	Caught in the ring 17.8%	Cohort

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.
