SUMMARY

- Plan for right-arm pace: bowl **good length pitching on the stumps**.
- Most often out **caught** (33% of dismissals); most often to right fast (2).

COMMON THEMES

- left-hand bat, averaging 52.3 at a strike rate of 126.6.
- Carries a big share of the batting — 14.4% of team runs.
- Scores mainly through the leg side (62%).

STRENGTHS

- Main scoring shot is the drive (62% of runs).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught** (33% of dismissals); most often to right fast (2).
- Vulnerable to the **good length** (averages 26 there vs 52 overall; 3.6 dismissals/100).
- Struggles **on the stumps** (39 avg, 2.1 outs/100).
- Most dangerous ball: **good length and on the stumps** (2.9 dismissals/100, avg 30).

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Todd Murphy	Off-spin	27.9	93.7	59.9	back of a length, outside off	LBW 17.2%	Cohort
Jack Edwards	Right pace	32.1	101.6	55.5	good length, 4th-stump channel	Caught behind 26.6%	Low
Tanveer Sangha	Leg-spin	39.0	111.2	56.0	good length, outside off	Caught in the ring 20.6%	Cohort
Liam Scott	Right pace	41.4	93.5	44.3	good length, 4th-stump channel	Caught behind 26.6%	Low
Nathan McSweeney	Off-spin	46.6	97.5	45.8	back of a length, outside off	Caught in the ring 17.8%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (right-arm pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Length						
Length	Avg	SR	False%	Outs/100	Bdry%	Balls
Good length	26.0	93	24%	3.57	15%	84

Pitching line						
Pitching line	Avg	SR	False%	Outs/100	Bdry%	Balls
on the stumps	39.0	81	17%	2.08	15%	48

Over vs round						
Over vs round	Avg	SR	False%	Outs/100	Bdry%	Balls
Over the wicket	—	102	29%	0.00	17%	64
Round the wicket	30.7	153	20%	5.00	25%	60

DANGER BALL — WHERE THEY'RE MOST LIKELY OUT [▶ WATCH DANGER BALLS](#)

Good length / on the stumps

2.9 dismissals per 100 · averages 30 here · 35 balls · false shot 21%

How They Score & Get Out

Scores most of their runs through the leg side (62%; off 33% · leg 62% · straight 5%).

Shot types (risk)

Shot	Avg	SR	False%	Outs/100	Bdry%	Balls
------	-----	----	--------	----------	-------	-------

Where they score — runs by area vs right-arm pace (mirrored for a left-hander).

Most often out **caught** (33% of dismissals); most often to right fast (2).

Caught	1	33%
Caught in the field	1	33%
Caught behind	1	33%

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Field vs right-arm pace

Early — first 30 balls · 85 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller, so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
