SUMMARY

- A solid, patient batter — vulnerable to seam.
- Noticeably weaker against spin (averages 27 vs 39 against pace; falser shot 15% vs 28%) — attack them with spin.
- They get out most often to balls that are **back of a length and outside off** (8.0 dismissals/100).
- Most often out **caught behind** (42% of dismissals); most often to right fast (6).
- Vulnerable early — get at them hard in their first 30 balls.

COMMON THEMES

- right-hand bat, averaging 32.7 at a strike rate of 85.0.
- Carries a big share of the batting — 12.7% of team runs.
- Scores mainly through the off side (43%).

STRENGTHS

- Main scoring shot is the drive (42% of runs).

WEAKNESSES / HOW TO GET HIM

- Noticeably weaker against spin (averages 27 vs 39 against pace; falser shot 15% vs 28%) — attack them with spin.
- **Get them early** — they're 2.8× more likely to fall in their first 30 balls (3.8 vs 1.4 dismissals/100 once set; false shot 21% vs 26%). Early runs come mainly off the drive (42%).
- Most often out **caught behind** (42% of dismissals); most often to right fast (6).
- Vulnerable to the **back of a length** (averages 14 there vs 33 overall; 7.1 dismissals/100).
- Most dangerous ball: **back of a length and outside off** (8.0 dismissals/100, avg 10).
- His **pull/hook** is high-risk (false shot 33%, 5.1 outs/100).

Batting Fingerprint (percentile vs Test batters)

A solid, patient batter — vulnerable to seam.

Changing (last 3 years vs career): strike rate up; false % vs spin down.

Solid line = career, dotted = last 3 years (avg / SR / false% vs pace & spin). Percentile among Test batters (≥1500 balls). Red = a target (high vulnerability); green = a strength.

Makes **12.7%** of their team's runs over a career (typical innings 4.0%), and **6.1%** of all runs in their matches; carries the innings ($\geq 25\%$ of the team's runs) **20%** of the time.

Against Each Bowler Type

Noticeably weaker against spin (averages 27 vs 39 against pace; falser shot 15% vs 28%) — attack them with spin.

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Pace	38.7	82.0	27.8%	2.12	283
Spin	26.7	89.9	15.0%	3.37	178
Right Fast	36.0	85.0	28.0%	2.36	254

Start of Innings vs Set

Get them early — they're 2.8× more likely to fall in their first 30 balls (3.8 vs 1.4 dismissals/100 once set; false shot 21% vs 26%). Early runs come mainly off the drive (42%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	15.3	58	21%	3.77	3%	239
Once set (31+)	84.7	114	26%	1.35	10%	222

v India · 2 Tests · 382 balls · 162 runs · avg 54.0

They stayed over the wicket, stuck to a good length in the channel. 3 dismissals — 2 bowled and 1 caught.

Ball	Them	Teammates	
Pitched wide of off	20%	28%	▼ less

v Pakistan · 2 Tests · 233 balls · 86 runs · avg 21.5

Too few balls in this series to compare a plan.

v Australia · 1 Test · 56 balls · 10 runs · avg 5.0

Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	22.8	75.4	56.0	good length, at the stumps	Caught behind 25.4%	Med
Mitch Starc	Left pace	23.0	85.5	60.4	good length, 4th-stump channel	Caught behind 23.3%	Cohort
Pat Cummins	Right pace	29.4	83.7	51.0	short, wide of off	Caught behind 26.2%	Med
Josh Hazlewood	Right pace	30.0	72.1	46.9	good length, 4th-stump channel	Caught behind 26.1%	Med
Adam Zampa	Leg-spin	31.5	91.1	56.5	good length, outside off	LBW 21.4%	Cohort

Structurally, left-arm orthodox turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (vs pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Caught in the field	4	33%
Bowled	3	25%

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs right-arm pace

Early — first 30 balls · 125 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Backward square leg	Change	He works 44% of his runs to leg (P80) — squarer leg-side saver.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Stock field + 1 change (highlighted).

Floating fielder: They score only 6% of their runs where point stands — the spare run-saver to move as the game asks.

Once set · 129 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Backward square leg	Change	He works 44% of his runs to leg (P80) — squarer leg-side saver.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Square leg	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Leg-side stock field — strong through the leg side (43% of their runs vs 33% off) — a squarer leg-side ring, one slip out. + 1 change (highlighted).

Floating fielder: They score only 7% of their runs where backward square leg stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller (P28), so this is a holding / surprise option, not a

wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
