Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	21.0	76.9	60.0	good length, 4th-stump channel	Caught behind 26.4%	Cohort
Josh Hazlewood	Right pace	27.1	74.0	49.5	good length, 4th-stump channel	Caught behind 26.0%	Cohort
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Nathan Ellis	Right pace	33.1	84.9	47.6	short, 4th-stump channel	Caught behind 27.2%	Cohort
Mitch Marsh	Right pace	34.5	88.5	48.3	good length, 4th-stump channel	Caught behind 25.4%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Pure off-side / square stock field — Scores square and through the off (54% vs 29% leg) — an extra fielder square on the off, one leg-sider out..

Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 2% of their runs where third man stands — the spare run-saver to move as the game asks.

Bouncer plan

He pulls a fair amount (P61) — the bumper can buy a top-edge. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
