Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	21.0	76.9	60.0	good length, 4th-stump channel	Caught behind 26.4%	Cohort
Josh Hazlewood	Right pace	27.1	74.0	49.5	good length, 4th-stump channel	Caught behind 26.0%	Cohort
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Nathan Ellis	Right pace	33.1	84.9	47.6	short, 4th-stump channel	Caught behind 27.2%	Cohort
Mitch Marsh	Right pace	34.5	88.5	48.3	good length, 4th-stump channel	Caught behind 25.4%	Cohort

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.

Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against left-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 2% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

He pulls a fair amount (P61) — the bumper can buy a top-edge. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
