SUMMARY

- A solid, steady batter — no glaring weakness.
- Plan for left-arm orthodox: bowl **good length pitching on the stumps**.
- Most often out **caught in the field** (75% of dismissals); most often to left orthodox (4).

COMMON THEMES

- left-hand bat, averaging 45.0 at a strike rate of 100.0.
- Carries a big share of the batting — 13.5% of team runs.
- Scores mainly through the V (56%).

STRENGTHS

- Main scoring shot is the sweep (34% of runs).
- The **slog** brings them 8% of their runs vs spin — 1.4× the typical Test batter's share. Scores unusually little off the **cut** vs spin (3% of runs vs 8% typically).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (75% of dismissals); most often to left orthodox (4).
- Vulnerable to the **good length** (averages 29 there vs 45 overall; 1.9 dismissals/100).

v Bangladesh · 1 Test · 100 balls · 60 runs · avg 60.0
Too few balls in this series to compare a plan.

v Afghanistan · 1 Test · 8 balls · 5 runs · avg 5.0
Too few balls in this series to compare a plan.

v New Zealand · 2 Tests · 228 balls · 85 runs · avg 21.2
Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other LHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	21.2	72.7	57.1	good length, 4th-stump channel	Caught behind 26.9%	High
Josh Hazlewood	Right pace	26.6	71.6	49.2	good length, 4th-stump channel	Caught behind 27.6%	Med
Nathan Ellis	Right pace	30.9	80.1	48.1	short, 4th-stump channel	Caught behind 27.8%	High
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Mitch Marsh	Right pace	33.9	86.4	48.5	good length, 4th-stump channel	Caught behind 27.1%	Med

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (left-arm orthodox)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Length						
Length	Avg	SR	False%	Outs/100	Bdry%	Balls
Good length	29.0	54	11%	1.85	4%	54

Over vs round

Over vs round	Avg	SR	False%	Outs/100	Bdry%	Balls
Over the wicket	50.7	113	18%	2.22	13%	135

Pitching line	Avg	SR	False%	Outs/100	Bdry%	Balls
on the stumps	75.5	111	14%	1.47	11%	136

How They Score & Get Out

Scores most of their runs through straight down the ground (56%; off 24% · leg 20% · straight 56%).

Shot types (risk) [▶ their work/nudge](#)

Shot	Avg	SR	False%	Outs/100	Bdry%	Balls
Work/Nudge	32.0	64	11%	2.00	2%	50

Scoring mix vs the typical Test batter (vs spin)

The **slog** brings them 8% of their runs vs spin — 1.4× the typical Test batter's share. Scores unusually little off the **cut** vs spin (3% of runs vs 8% typically).

Shot	% of their runs	Typical	Index	Pctl
Drive	33%	33%	1.0×	P50
Work/Nudge	33%	25%	1.3×	P78
Sweep	21%	16%	1.3×	P67
Slog	8%	6%	1.4×	P74
Pull/Hook	3%	6%	0.4×	P12
Cut	3%	8%	0.3×	P7
Ramp/Scoop	0%	0%	—	P51

Share of stroke-coded runs vs spin; index = their share ÷ cohort median (144 Test batters). Highlight = signature shot; ▼ = scores unusually little there.

Most often out **caught in the field** (75% of dismissals); most often to left orthodox (4).

Dismissal mode	Count	%
Caught in the field	3	75%
Caught behind	1	25%

Where they score — runs by area vs left-arm orthodox (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.

Field vs left-arm orthodox

Once set · 105 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Short leg	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Long-on	Stock	Standard stock position.
Deep midwicket	Stock	Standard stock position.
Backward square leg	Change	He works 38% of his runs to leg (P88) — squarer leg-side saver.
Fine leg	Stock	Standard stock position.

Stock field + 1 change (highlighted).

Floating fielder: They score only 2% of their runs where backward square leg stands — the spare run-saver to move as the game asks.
