innings with ≥25% of team

SUMMARY

- Stronger against spin (34) than pace (22); pace — especially the quicks — is the more productive line of attack.
- They get out most often to balls that are **good length and outside off** (2.8 dismissals/100).
- Most often out **caught in the field** (37% of dismissals); most often to right fast (7).

COMMON THEMES

- right-hand bat, averaging 24.3 at a strike rate of 61.7.
- Carries a big share of the batting — 12.7% of team runs.
- Scores mainly through the V (40%).

STRENGTHS

- Main scoring shot is the work/nudge (44% of runs).
- Stronger against spin (34) than pace (22); pace — especially the quicks — is the more productive line of attack.
- Starts securely — their dismissal rate barely drops once set (2.2 early vs 3.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (48%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (37% of dismissals); most often to right fast (7).
- Struggles **outside off** (9 avg, 5.6 outs/100).
- Most dangerous ball: **good length and outside off** (2.8 dismissals/100, avg 17).
- His **drive** is high-risk (false shot 44%, 1.8 outs/100).

Match Impact (share of runs)

Makes **12.7%** of their team's runs over a career (typical innings 9.2%), and **6.2%** of all runs in their matches; carries the innings (≥25% of the team's runs) **15% of the time, and dominates (≥40%) 5%.**

Against Each Bowler Type

Stronger against spin (34) than pace (22); pace — especially the quicks — is the more productive line of attack.

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Pace	21.8	58.9	24.6%	2.70	555
Spin	33.5	69.8	12.4%	2.08	192
Right Fast	18.3	55.7	21.4%	3.04	230
Left Fast	49.5	55.0	28.6%	1.11	180
Off Spin	37.0	73.5	12.4%	1.99	151
Right Medium	15.8	73.8	27.1%	4.67	107

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (2.2 early vs 3.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (48%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	22.6	51	22%	2.24	6%	447
Once set (31+)	26.1	78	21%	3.00	7%	300

v Bangladesh · 1 Test · 227 balls · 140 runs · avg 140.0

They stayed over the wicket, stuck to a good length in the channel. 1 dismissal — 1 caught.

Ball	Them	Teammates	
------	------	-----------	--

v West Indies · 2 Tests · 287 balls · 172 runs · avg 43.0

They pitched it up at their stumps. 4 dismissals — 3 caught and 1 LBW, the wicket ball most often yorker length, at the stumps.

Ball	Them	Teammates	
------	------	-----------	--

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	21.0	76.9	60.0	good length, 4th-stump channel	Caught behind 26.4%	Cohort
Josh Hazlewood	Right pace	27.1	74.0	49.5	good length, 4th-stump channel	Caught behind 26.0%	Cohort
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Nathan Ellis	Right pace	33.1	84.9	47.6	short, 4th-stump channel	Caught behind 27.2%	Cohort
Mitch Marsh	Right pace	34.5	88.5	48.3	good length, 4th-stump channel	Caught behind 25.4%	Cohort

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (vs pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Seam movement

Caught in the field	7	37%
Caught behind	6	32%
LBW	5	26%
Bowled	1	5%

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs right-arm pace

Early — first 30 balls · 250 balls

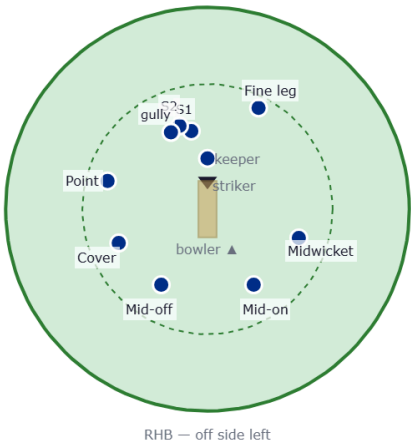

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Once set · 87 balls

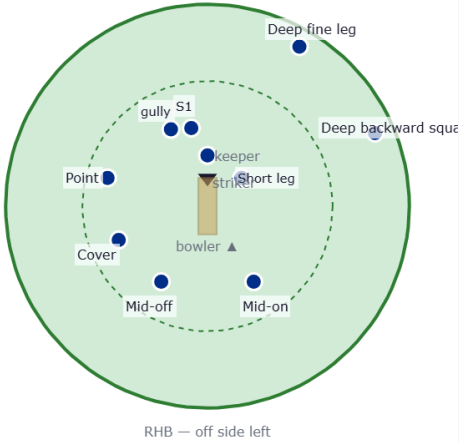

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Bouncer plan

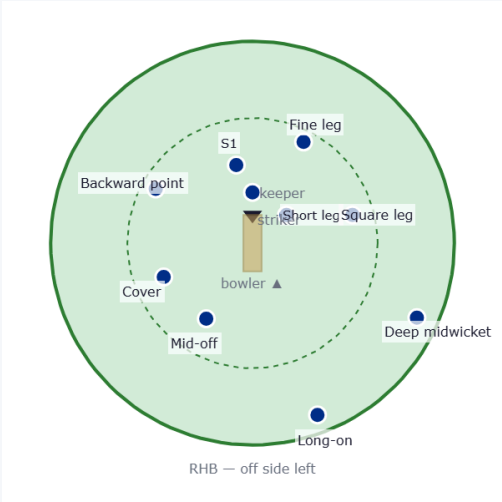

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

He pulls a fair amount (P78) — the bumper can buy a top-edge. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).

Field vs off spin

Once set · 132 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Short leg	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Long-on	Stock	Standard stock position.
Deep midwicket	Stock	Standard stock position.
Square leg	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against off spin, so the orthodox field stands — that is the read.

Floating fielder: They score only 0% of their runs where backward point stands — the spare run-saver to move as the game asks.
