Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

| Bowler          | Type       | Exp avg | Exp SR | Out in first 30 % | Stock wicket ball              | Top dismissal       | Confidence |
|-----------------|------------|---------|--------|-------------------|--------------------------------|---------------------|------------|
| Xavier Bartlett | Right pace | 21.0    | 76.9   | 60.0              | good length, 4th-stump channel | Caught behind 26.4% | Cohort     |
| Josh Hazlewood  | Right pace | 27.1    | 74.0   | 49.5              | good length, 4th-stump channel | Caught behind 26.0% | Cohort     |
| Adam Zampa      | Leg-spin   | 32.3    | 91.6   | 55.8              | good length, outside off       | LBW 21.5%           | Cohort     |
| Nathan Ellis    | Right pace | 33.1    | 84.9   | 47.6              | short, 4th-stump channel       | Caught behind 27.2% | Cohort     |
| Mitch Marsh     | Right pace | 34.5    | 88.5   | 48.3              | good length, 4th-stump channel | Caught behind 25.4% | Cohort     |

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

## Where They're Vulnerable (off spin)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

## How They Score & Get Out

Scores most of their runs through the off side (47%; off 47% · leg 14% · straight 39%).
