Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	23.9	74.6	55.6	good length, at the stumps	Caught behind 25.1%	High
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Josh Hazlewood	Right pace	33.5	73.7	44.5	good length, 4th-stump channel	Caught behind 24.6%	High
Spencer Johnson	Left pace	35.6	86.9	46.8	good length, 4th-stump channel	Caught behind 27.4%	Cohort
Nathan Ellis	Right pace	40.5	83.2	41.6	good length, 4th-stump channel	Caught behind 27.3%	High

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.
