SUMMARY

- A high-class, aggressive batter — strong vs short.
- Plan for right-arm pace: bowl **full pitching on the stumps**.
- They get out most often to balls that are **back of a length and on the stumps** (6.9 dismissals/100).
- Most often out **caught in the field** (29% of dismissals); most often to right fast (20).

COMMON THEMES

- left-hand bat, averaging 40.1 at a strike rate of 82.3.
- Carries a big share of the batting — 17.6% of team runs.
- Scores mainly through the off side (35%).

STRENGTHS

- Main scoring shot is the drive (36% of runs).
- The **pull/hook** brings them 30% of their runs vs right-arm pace — 1.5× the typical Test batter's share.

WEAKNESSES / HOW TO GET HIM

- Somewhat more vulnerable early (2.2 vs 1.9 dismissals/100 once set). Early runs come mainly off the drive (33%).
- Most often out **caught in the field** (29% of dismissals); most often to right fast (20).
- Vulnerable to the **full** (averages 32 there vs 40 overall; 2.9 dismissals/100).
- Struggles **on the stumps** (28 avg, 2.8 outs/100).
- Most dangerous ball: **back of a length and on the stumps** (6.9 dismissals/100, avg 20).
- His **cut** is high-risk (false shot 39%, 2.2 outs/100).

Start of Innings vs Set

Somewhat more vulnerable early (2.2 vs 1.9 dismissals/100 once set). Early runs come mainly off the drive (33%).

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	23.9	74.6	55.6	good length, at the stumps	Caught behind 25.1%	High
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Josh Hazlewood	Right pace	33.5	73.7	44.5	good length, 4th-stump channel	Caught behind 24.6%	High
Spencer Johnson	Left pace	35.6	86.9	46.8	good length, 4th-stump channel	Caught behind 27.4%	Cohort
Nathan Ellis	Right pace	40.5	83.2	41.6	good length, 4th-stump channel	Caught behind 27.3%	High

Structurally, off-spin turning the ball away from the LHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the right.
