## SUMMARY

- A solid, steady batter — strong vs swing, tight technique.
- They get out most often to balls that are **back of a length and outside off** (9.1 dismissals/100).
- Most often out **caught in the field** (53% of dismissals); most often to right fast (20).

## COMMON THEMES

- right-hand bat, averaging 38.6 at a strike rate of 87.7.
- Carries a big share of the batting — 15.5% of team runs.
- Scores mainly through the off side (35%).

## STRENGTHS

- Main scoring shot is the drive (37% of runs).
- Handles both similarly (pace 39, spin 38).
- Starts securely — their dismissal rate barely drops once set (2.0 early vs 2.8/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (37%).

## WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (53% of dismissals); most often to right fast (20).
- Vulnerable to the **back of a length** (averages 16 there vs 39 overall; 6.8 dismissals/100).
- Struggles **down the leg side** (22 avg, 3.5 outs/100).
- The ball that seams away hurts them (avg 12 vs 31 when it holds its line).
- The ball that swings in hurts them (avg 22 vs 33 when it holds its line).
- Most dangerous ball: **back of a length and outside off** (9.1 dismissals/100, avg 10).
- His **cut** is high-risk (false shot 39%, 2.9 outs/100).

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.
