SUMMARY

- A solid, steady batter — strong vs swing, tight technique.
- Plan for left-arm pace: bowl **good length pitching on the stumps**.
- Most often out **bowled** (50% of dismissals); most often to left fast (9).

COMMON THEMES

- right-hand bat, averaging 32.1 at a strike rate of 83.4.
- Carries a big share of the batting — 15.5% of team runs.
- Scores mainly through the off side (43%).

STRENGTHS

- Main scoring shot is the drive (43% of runs).
- Starts securely — their dismissal rate barely drops once set (1.7 early vs 4.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (43%).

WEAKNESSES / HOW TO GET HIM

- Most often out **bowled** (50% of dismissals); most often to left fast (9).

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (1.7 early vs 4.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (43%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	41.5	71	22%	1.70	9%	235
Once set (31+)	25.8	103	21%	4.00	10%	150

v Afghanistan · 1 Test · 88 balls · 65 runs · avg 65.0
Too few balls in this series to compare a plan.

v New Zealand · 2 Tests · 41 balls · 16 runs · avg 4.0
Too few balls in this series to compare a plan.

v England · 1 Test · 86 balls · 66 runs · avg 33.0
Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	24.7	79.7	56.4	good length, 4th-stump channel	Caught behind 26.1%	High
Josh Hazlewood	Right pace	29.6	75.9	47.4	good length, 4th-stump channel	Caught behind 26.0%	High
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Spencer Johnson	Left pace	35.4	82.3	46.0	short, 4th-stump channel	Caught behind 27.5%	Low
Nathan Ellis	Right pace	36.8	88.2	46.1	short, 4th-stump channel	Caught behind 27.2%	High

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (left-arm pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Length						
Length	Avg	SR	False%	Outs/100	Bdry%	Balls
Full	—	94	25%	0.00	12%	51
Good length	65.0	52	20%	0.81	5%	124

Over vs round						
Over vs round	Avg	SR	False%	Outs/100	Bdry%	Balls
Over the wicket	30.1	77	24%	2.56	8%	273
Round the wicket	36.7	98	15%	2.68	11%	112

Pitching line	Avg	SR	False%	Outs/100	Bdry%	Balls
on the stumps	36.0	87	21%	2.41	9%	291

How They Score & Get Out

Scores most of their runs through the off side (43%; off 43% · leg 26% · straight 31%).

Shot types (risk) [▶ their drive](#)

Shot	Avg	SR	False%	Outs/100	Bdry%	Balls
Drive	60.0	176	21%	2.94	28%	68
Work/Nudge	43.5	72	17%	1.65	1%	121

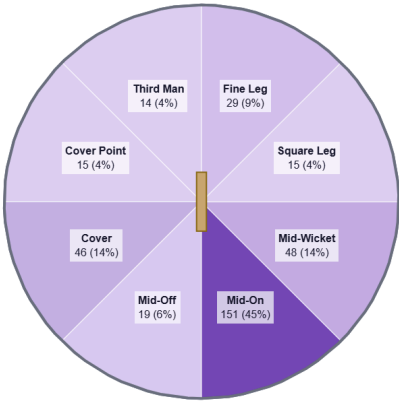

Scoring mix vs the typical Test batter (vs pace)

Shot	% of their runs	Typical	Index	Pctl
Drive	35%	34%	1.0×	P54
Work/Nudge	30%	28%	1.1×	P58
Pull/Hook	23%	20%	1.2×	P71
Cut	7%	8%	0.9×	P37
Sweep	3%	0%	8.5×	P87
Slog	2%	5%	0.4×	P21
Ramp/Scoop	1%	1%	2.1×	P61

Share of stroke-coded runs vs pace; index = their share ÷ cohort median (171 Test batters). Highlight = signature shot; ▼ = scores unusually little there.

Most often out **bowled** (50% of dismissals); most often to left fast (9). [▶ watch dismissals](#)

Dismissal mode	Count	%
Bowled	5	50%
Caught in the field	4	40%
Caught behind	1	10%

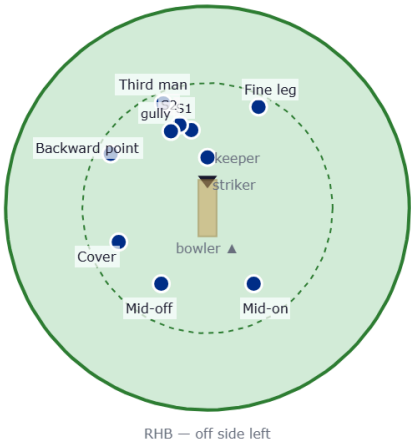

Where they score — runs by area vs left-arm pace (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodox line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs left-arm pace

Early — first 30 balls · 235 balls

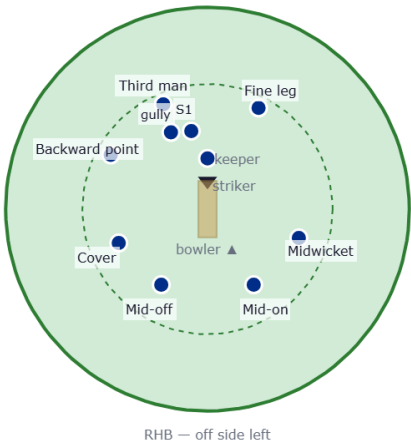

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against left-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 5% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Once set · 150 balls

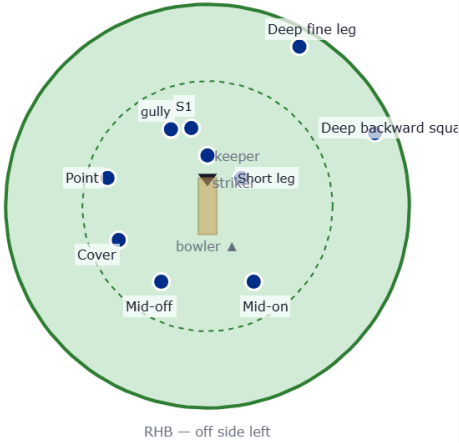

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.
Third man	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against left-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 3% of their runs where backward point stands — the spare run-saver to move as the game asks.

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller (P54), so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
