SUMMARY

- A solid, steady batter — strong vs spin, tight technique.
- Plan for off spin: bowl **good length pitching outside off**.
- They get out most often to balls that are **back of a length and on the stumps** (3.4 dismissals/100).
- Most often out **caught in the field** (45% of dismissals); most often to off spin (11).

COMMON THEMES

- right-hand bat, averaging 52.9 at a strike rate of 84.6.
- Carries a big share of the batting — 15.5% of team runs.
- Scores mainly through the V (37%).

STRENGTHS

- Main scoring shot is the drive (38% of runs).
- Scores unusually little off the **cut** vs off spin (3% of runs vs 7% typically).
- Starts securely — their dismissal rate barely drops once set (1.4 early vs 2.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (37%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (45% of dismissals); most often to off spin (11).
- Vulnerable to the **good length** (averages 16 there vs 53 overall; 3.4 dismissals/100).
- Most dangerous ball: **back of a length and on the stumps** (3.4 dismissals/100, avg 27).
- His **sweep** is high-risk (false shot 26%, 7.1 outs/100).

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (1.4 early vs 2.0/100); early pressure alone won't buy their wicket. Early runs come mainly off the drive (37%).

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	24.7	79.7	56.4	good length, 4th-stump channel	Caught behind 26.1%	High
Josh Hazlewood	Right pace	29.6	75.9	47.4	good length, 4th-stump channel	Caught behind 26.0%	High
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Spencer Johnson	Left pace	35.4	82.3	46.0	short, 4th-stump channel	Caught behind 27.5%	Low
Nathan Ellis	Right pace	36.8	88.2	46.1	short, 4th-stump channel	Caught behind 27.2%	High

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.
