SUMMARY

- A solid, steady batter — strong vs swing, tight technique.
- Plan for right-arm pace: bowl **back of a length pitching wide outside off** while **seaming away / swinging in**.
- Most often out **caught in the field** (61% of dismissals); most often to right fast (20).

COMMON THEMES

- right-hand bat, averaging 41.0 at a strike rate of 96.5.
- Carries a big share of the batting — 15.5% of team runs.
- Scores mainly through the leg side (37%).

STRENGTHS

- Main scoring shot is the drive (33% of runs).
- Starts securely — their dismissal rate barely drops once set (1.9 early vs 3.1/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (37%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (61% of dismissals); most often to right fast (20).
- Vulnerable to the **back of a length** (averages 23 there vs 41 overall; 4.9 dismissals/100).
- Struggles **wide outside off** (30 avg, 4.4 outs/100).
- The ball that seams away hurts them (avg 12 vs 36 when it holds its line).
- The ball that swings in hurts them (avg 22 vs 31 when it holds its line).
- Most dangerous ball: **back of a length and outside off** (9.1 dismissals/100, avg 10).
- His **cut** is high-risk (false shot 35%, 2.4 outs/100).

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (1.9 early vs 3.1/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (37%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	39.4	75	15%	1.89	8%	740
Once set (31+)	42.6	132	16%	3.11	15%	450

v Afghanistan · 1 Test · 88 balls · 65 runs · avg 65.0
Too few balls in this series to compare a plan.

v New Zealand · 2 Tests · 41 balls · 16 runs · avg 4.0
Too few balls in this series to compare a plan.

v England · 1 Test · 86 balls · 66 runs · avg 33.0
Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	24.7	79.7	56.4	good length, 4th-stump channel	Caught behind 26.1%	High
Josh Hazlewood	Right pace	29.6	75.9	47.4	good length, 4th-stump channel	Caught behind 26.0%	High
Adam Zampa	Leg-spin	32.3	91.6	55.8	good length, outside off	LBW 21.5%	Cohort
Spencer Johnson	Left pace	35.4	82.3	46.0	short, 4th-stump channel	Caught behind 27.5%	Low
Nathan Ellis	Right pace	36.8	88.2	46.1	short, 4th-stump channel	Caught behind 27.2%	High

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (right-arm pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

Seam movement

Seam movement	Avg	SR	False%	Outs/100	Bdry%	Balls
seams in	51.0	109	14%	2.13	17%	47
no seam	36.5	117	7%	3.20	12%	125
seams away	11.8	77	14%	6.56	7%	61

Caught in the field	17	61%
Caught behind	4	14%
Caught	3	11%
Bowled	2	7%
LBW	2	7%

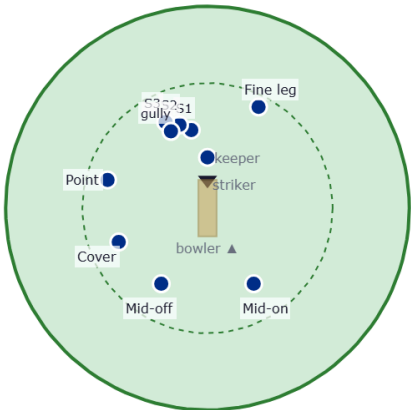

Where they score — runs by area vs right-arm pace (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs right-arm pace

Early — first 30 balls · 740 balls

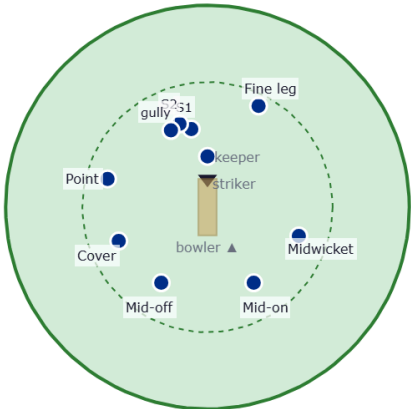

RHB — off side left

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Once set · 450 balls

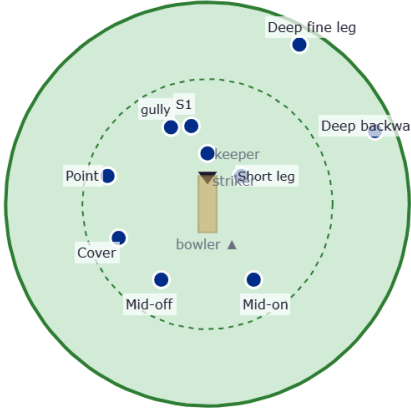

RHB — off side left

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Pure stock field. Nothing in their game clears the deviation bar (cohort P75) against right-arm pace, so the orthodox field stands — that is the read.

Floating fielder: They score only 5% of their runs where mid-off stands — the spare run-saver to move as the game asks.

Bouncer plan

RHB — off side left

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller (P54), so this is a holding / surprise option, not a wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).
