of team, per innings

CARRIES THE INNINGS

9%

innings with ≥25% of team

SUMMARY

- Stronger against spin (32) than pace (19); pace — especially the quicks — is the more productive line of attack.
- They get out most often to balls that are **full and outside off** (6.2 dismissals/100).
- Most often out **caught in the field** (48% of dismissals); most often to right fast (14).

COMMON THEMES

- right-hand bat, averaging 23.8 at a strike rate of 77.1.
- Carries a big share of the batting — 10.8% of team runs.
- Scores mainly through the leg side (36%).

STRENGTHS

- Main scoring shot is the drive (33% of runs).
- Stronger against spin (32) than pace (19); pace — especially the quicks — is the more productive line of attack.
- Starts securely — their dismissal rate barely drops once set (3.1 early vs 3.5/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (32%).

WEAKNESSES / HOW TO GET HIM

- Most often out **caught in the field** (48% of dismissals); most often to right fast (14).
- Vulnerable to the **full** (averages 10 there vs 24 overall; 7.8 dismissals/100).
- Struggles **outside off** (14 avg, 4.5 outs/100).
- Most dangerous ball: **full and outside off** (6.2 dismissals/100, avg 14).
- His **pull/hook** is high-risk (false shot 32%, 5.8 outs/100).

Match Impact (share of runs)

Makes **10.8%** of their team's runs over a career (typical innings 6.9%), and **5.2%** of all runs in their matches; carries the innings (≥25% of the team's runs) **9% of the time**.

Against Each Bowler Type

Stronger against spin (32) than pace (19); pace — especially the quicks — is the more productive line of attack.

Bowler type	Average	Strike rate	False-shot %	Dismissals / 100	Balls
Pace	19.1	69.8	22.2%	3.65	603
Spin	32.4	87.5	11.3%	2.70	407
Right Fast	16.3	67.7	21.7%	4.15	337
Off Spin	38.4	91.4	8.0%	2.38	210
Left Fast	25.0	80.6	22.1%	3.23	155
Left Orthodox	31.2	85.0	14.9%	2.72	147

Start of Innings vs Set

Starts securely — their dismissal rate barely drops once set (3.1 early vs 3.5/100); early pressure alone won't buy their wicket. Early runs come mainly off the work/nudge (32%).

Phase	Average	Strike rate	False-shot %	Dismissals / 100	Boundary %	Balls
First 30 balls	22.1	69	17%	3.13	7%	703
Once set (31+)	27.1	95	19%	3.50	10%	314

How Attacks Bowl To Them (last 3 series)

v Bangladesh · 1 Test · 108 balls · 77 runs

They stayed over the wicket, banged it in short in the channel. Not dismissed in the series.

Ball	Them	Teammates	
A good length	77%	92%	▼ less
Short	11%	2%	▲ more
Cut ball (short, wide off)	11%	2%	▲ more

v South Africa · 2 Tests · 93 balls · 45 runs · avg 11.2

They pitched it up at their stumps. 4 dismissals — 2 LBW, 1 caught and 1 bowled, the wicket ball most often yorker length, at the stumps, playing the forward defence.

Ball	Them	Teammates	

v England · 1 Test · 46 balls · 31 runs · avg 15.5

Too few balls in this series to compare a plan.

Only the balls of each attack's pace plan that differed from what the same bowlers gave that side's other RHB top-order batters. The full dismissal detail sits in the vision playlists.

Our Best Options (simulated matchups)

From the match simulation — a tool that plays each batter-v-bowler pairing out thousands of times from their full Test profiles. Low expected average = the bowler wins the matchup. "Cohort" confidence = they have not faced enough of that type for a personal read.

Bowler	Type	Exp avg	Exp SR	Out in first 30 %	Stock wicket ball	Top dismissal	Confidence
Xavier Bartlett	Right pace	16.6	74.8	65.7	good length, 4th-stump channel	Caught behind 26.6%	Med
Josh Hazlewood	Right pace	22.4	71.8	55.4	good length, 4th-stump channel	Caught behind 26.4%	Med
Nathan Ellis	Right pace	25.3	81.8	56.4	short, 4th-stump channel	Caught behind 27.7%	Med
Mitch Marsh	Right pace	28.6	86.0	53.8	good length, 4th-stump channel	Caught behind 25.8%	Med
Cameron Green	Right pace	29.5	86.2	53.0	short, 4th-stump channel	Caught behind 28.3%	Med

Structurally, leg-spin turning the ball away from the RHB is the matchup class that persists — favour that angle when the individual reads are thin.

Where They're Vulnerable (vs pace)

Per bucket: batting average, strike rate, false-shot %, dismissals per 100 balls, boundary %. Pink row = their lowest-average (softest) bucket in that dimension.

LBW	6	18%
Bowled	5	15%
Caught	3	9%
Caught behind	3	9%

Where they score — runs by area (mirrored for a left-hander).

Suggested Fields (the stock field ± their evidenced deviations)

Each field starts from the **stock template** for that bowler type & phase (orthodox because it works), then makes at most **three** changes — each one earned by a trigger in **their** game clearing the cohort P75 bar (do they lap, cut, pull, score square, edge early?). **Change** rows are highlighted with their stat; **Stock** rows carry the orthodoxy line. The read line backtests the changes against the pure stock field. Early = first 30 balls; Set = once in. Drawn from behind the bowler (bowler bottom, striker top); off side is on the left.

Field vs right-arm pace

Early — first 30 balls · 320 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
3rd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Backward square leg	Change	He works 54% of his runs to leg (P93) — squarer leg-side saver.
Mid-on	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Stock field + 1 change (highlighted).

Floating fielder: They score only 4% of their runs where mid-on stands — the spare run-saver to move as the game asks.

Once set · 102 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
2nd slip	Stock	Standard stock position.
Gully	Stock	Standard stock position.
Backward point	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Backward square leg	Change	He works 54% of his runs to leg (P93) — squarer leg-side saver.
Midwicket	Stock	Standard stock position.

Off-side / square stock field — scores square and through the off (45% vs 30% leg) — an extra fielder square on the off, one leg-sider out. + 1 change (highlighted).

Bouncer plan

Fielder	Stock/Change	Why they're there
1st slip	Change	One slip kept for the top / outside edge.
Short leg	Change	Catcher in front of square for the fend or glove off the hip.
Gully	Change	The steer or fend that flies squarer of the wicket.
Point	Change	Ring saver for the bumper plan.
Cover	Change	Ring saver for the bumper plan.
Mid-off	Change	Ring saver for the bumper plan.
Mid-on	Change	Ring saver for the bumper plan.
Deep backward square	Change	Deep behind square for the top-edged pull.
Deep fine leg	Change	Deep behind square for the hook.

A standard bumper field — he isn't a heavy puller (P52), so this is a holding / surprise option, not a

wicket-taking plan. One slip, a catcher in front of square, and the two legal leg-side riders (deep backward square + deep fine leg).

Field vs off spin

Early — first 30 balls · 129 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Deep square leg	Change	Pulls/hooks 11% of his runs (P92) — deep square leg back.
Silly point	Stock	Standard stock position.
Point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Mid-on	Stock	Standard stock position.
Midwicket	Stock	Standard stock position.
Square leg	Stock	Standard stock position.

Stock field + 1 change (highlighted) — covering +50% of their boundary runs vs the pure stock field.

- Floating fielder: They score only 4% of their runs where cover stands — the spare run-saver to move as the game asks.
- Floating fielder: Silly point sees few of their edges (0.1 vs 1.3 for the cordon) — float to backward point as needed.

Once set · 81 balls

Fielder	Stock/Change	Why they're there
1st slip	Stock	Standard stock position.
Deep square leg	Change	Pulls/hooks 11% of his runs (P92) — deep square leg back.
Backward point	Stock	Standard stock position.
Cover	Stock	Standard stock position.
Mid-off	Stock	Standard stock position.
Long-on	Stock	Standard stock position.
Deep midwicket	Stock	Standard stock position.
Square leg	Stock	Standard stock position.
Fine leg	Stock	Standard stock position.

Stock field + 1 change (highlighted) — covering +31% of their boundary runs vs the pure stock field.

- Floating fielder: They score only 5% of their runs where backward point stands — the spare run-saver to move as the game asks.
