Solid line = career, dotted = last 3 years. Percentile within same-type ODI peers (grey = the peer distribution, line = this bowler). Release/crease vs hand × pace/spin; movement/speed/repeatability vs pace/spin. **Crease variation** = how much they shift their release point sideways across the crease ball to ball (high = varies a lot, low = same spot every ball). **Repeatability** = length consistency over their stock-length band, so deliberate yorkers/bouncers don't count as poor control (high = tighter, more metronomic than peers). A marker at the very edge = beyond the typical peer range on that trait.

Phase Profile (where they bowl & how they go there)

Wellington bowls most in the **middle** (89% of their overs) and goes at **6.53** at the death vs 3.40 in the powerplay.

Phase	% of overs	Overs	Economy	Wkts	Average	SR	Boundary %	Dot %
Powerplay	3%	5.0	3.4 P98	1 P90	17.0	30.0	7%	67%
Middle	89%	160.7	5.15 P41	12 P19	68.9	80.3	7%	44%
Death	8%	15.0	6.53 P35	4 P63	24.5	22.5	10%	36%

Blue P## = percentile vs modern-era ODI spin peers in that phase (two-new-balls era, 2011+; economy inverted so **higher = harder to score off**, wickets = strike threat; grey = bottom third). So a high death-economy percentile means cheap for the death, where everyone leaks.

Match-ups (each hand, split over vs round the wicket)

Batter	Balls	Round %	Economy	Wkts	Average	SR	Boundary %
vs LHB	358	50%	6.12	6	60.8	59.7	8%
· over the wkt	179		5.97	4	44.5	44.8	8%
· round the wkt	179		6.27	2	93.5	89.5	8%
vs RHB	726	94%	4.77	11	52.5	66.0	6%
· over the wkt	44		4.23	0	—	—	5%
· round the wkt	682		4.8	11	49.6	62.0	7%

Round % = share of their balls to that hand bowled from round the wicket. Sub-rows split each hand over vs round (shown when ≥30 balls).

Where They Bowl (pitch map + beehive · over vs round · stock vs slower)

On pace (stock speed)

Too few tracked balls to map (in total) — no over/round or pitch/stumps split shown.

Off pace (slower balls)

Too few tracked balls to map (in total) — no over/round or pitch/stumps split shown.

ODI internationals only. Ball-change eras in this sample: two new balls (2011-Jul25) 98%; two→one from ov35 (Jul25+) 2%. Phase = Powerplay 1–10 / Middle 11–40 / Death 41–50. Economy charges wides + no-balls to the bowler. odi-1.2 · 03 Sep 2026.
