Solid line = career, dotted = last 3 years. Percentile within same-type **ODI** peers (grey = the peer distribution, line = this bowler). Release/crease vs hand × pace/spin; movement/speed/repeatability vs pace/spin. **Crease variation** = how much they shift their release point sideways across the crease ball to ball (high = varies a lot, low = same spot every ball). **Repeatability** = length consistency over their stock-length band, so deliberate yorkers/bouncers don't count as poor control (high = tighter, more metronomic than peers). A marker at the very edge = beyond the typical peer range on that trait.

Phase Profile (where they bowl & how they go there)

► wickets

Wesley bowls most in the **middle** (88% of their overs) and goes at **4.85** at the death vs 8.33 in the powerplay.

Phase	% of overs	Overs	Economy	Wkts	Average	SR	Boundary %	Dot %
Powerplay	2%	3.0	8.33 P0	0 P2	—	—	17%	33%
Middle	88%	119.3	4.98 P50	12 P35	49.5	59.7	7%	47%
Death	10%	13.0	4.85 P96	4 P81	15.8	19.5	4%	44%

Blue **P##** = percentile vs modern-era ODI spin peers in that phase (two-new-balls era, 2011+; economy inverted so **higher = harder to score off**, wickets = strike threat; grey = bottom third). So a high death-economy percentile means cheap for the death, where everyone leaks.

Match-ups (each hand, split over vs round the wicket)

Batter	Balls	Round %	Economy	Wkts	Average	SR	Boundary %
vs LHB	374	95%	5.21	3	108.3	124.7	7%
· round the wkt	355		5.12	3	101.0	118.3	7%
vs RHB	438	16%	4.89	13	27.5	33.7	6%
· over the wkt	367		4.84	12	24.7	30.6	6%
· round the wkt	71		5.15	1	61.0	71.0	8%

Round % = share of their balls to that hand bowled from round the wicket. Sub-rows split each hand over vs round (shown when ≥30 balls).

Where They Bowl (pitch map + beehive · over vs round · stock vs slower)

On pace (stock speed)

Too few tracked balls to map (in total) — no over/round or pitch/stumps split shown.

Off pace (slower balls)

Too few tracked balls to map (in total) — no over/round or pitch/stumps split shown.

The % on each pitch map is that slice's share of all legal balls (e.g. over the wicket, on pace). Off pace = slower-ball variations.
